An easier, safer - and more convenient way to disinfect your drinking water

# ChloRun

## An easier, safer - and more convenient way to disinfect your drinking water

The revolutionary ChloRun System combines a dedicated dispensing system with a SOLID CHLORINE water sanitation agent. Together, they are scientifically proven to consistently produce clean, safe water.

### The Advantages of the ChloRun System

**Easier** – No need for expert training or handling; fully automated system.

**Safer** – Contains no hazardous materials; No spillage of hazardous solutions, completely safe for your employees and your customers.

**More Convenient** – High Cl concentration, easy to transport and store available even in remote areas; fresh solution can be made on-site.

The ChloRun System is based on a world wide known sanitation agent, approved by World Health Organization (WHO) and the National Science Foundation (NSF), as well as by local Indian water suppliers such as MIDC and MJP. ChloRun is produced under certified ISO-9000 quality management standards.
